

PORTABLE DEHUMIDIFIERS

For maximum comfort in your everyday spaces

TERMAL presents its extended range of portable dehumidifiers: compact and with an essential design, creating the right degree of air moisture as needed in every environment, for small, medium and large spaces.

The units are equipped with a condensate collection tank, with a see-through window for 10 litre models to see the filling level and a connection for possible continuous condensate drainage.

Safety you control, thanks to the indicator light on the control panel that signals when the tank is full, with relative auto switch-off.

DT80-A1

- Automatic defrost
- Auto-restart: automatic re-start after a black-out
- Air filter
- Timer
- Continuous dehumidifying
- Comfort: automatically sets the degree of moisture according to the detected room temperature
- 2 air ventilation speeds: high and low

DTM-10 A

- Automatic defrost
- Auto-restart: automatic re-start after a black-out
- Air filter
- Timer
- Continuous dehumidifying

Portable			DTM-10 A	DT80-A1
Power		Ph/V/Hz	1/220~240/50	
Rated dehumidifying capacity	30°C DB - RH 80%	L/d	10	80
Control			Electronic	
Adjustment range (relative humidity)		%	40 ~ 60	50 ~ 80
Consumption		W	270	1350
Rated current		A	1.6	5.3
Sound pressure level (Hi/Lo)		dB(A)	-/43	-/48
Treated air flow (Hi/Lo)		m³/h	-/100	-/400
Supplied tank capacity		L	2.0	7.2
Operating range		°C	5 ~ 35	5 ~ 32
Refrigerant	Type/qty.	Kg	R134A/0.07	R410A/0.525
Global warming potential	GWP	kg CO2 eq.	1430	2088
Dimensions	LxDxH	mm	300x212x410	481x286x628
Net weight		Kg	10.7	24.5
