

# KXZ MICRO COMPACT

## Heat pump

### CONNECT UP TO 10 INDOOR UNITS/150% CAPACITY

FDC 121 KXZEN1/ZES1 12.1 kW single-phase/three-phase

FDC 140 KXZEN1/ZES1 14.0 kW single-phase/three-phase

FDC 155 KXZEN1/ZES1 15.5 kW single-phase/three-phase

### CHARACTERISTICS

- Maximum energy efficiency COP 3.91 (4HP)
- Scroll DC Inverter compressor on all units
- DC Inverter fan motors
- 4 sound levels in Silent mode
- New PCB cooling system: a refrigerant pipe branch passes to the base of the PCB to prevent overheating

### VRF-T TECHNOLOGY energy savings up to 34% in cooling

- **Can connect 1.5 kW indoor units**
- New system for managing indoor unit priorities
- "Pump down" safety function: to identify any gas leaks inside the room (third-party sensor) and start up the refrigerant recall procedure by the outdoor unit, present inside the system

### INSTALLATION DIAGRAM

\* The total length of piping, liquid side  $\phi 9.52$  mm (3/8") should be 50 m or less.

### OPERATING RANGE

### I.U. NUMBER INCREASED CONNECTABLE

	KXE6	NEW KXZ
4HP	6 units	→ 8 units
5HP	8 units	→ 10 unit1
5H6	8 units	→ 10 unit2

1. max capacity  $\leq 100\%$  with 9 or 10 connected units
2. max capacity  $\leq 100\%$  with 9 or 10 connected units

\* With limitations on maximum connectivity.

1. EU Delegated Regulation No.626/2011 on the labelling indicating the energy consumption of air conditioners. 2. EU Regulation No.206/2012 - N.2281/2016 - Value measured according to harmonised standard EN14825. 3. Value measured according to harmonised standard EN14511. 4. Refrigerant leakage contributes to climate change. When released into the atmosphere, refrigerants with a lower global warming potential (GWP) contribute less to global warming than those with a higher GWP. This appliance contains a refrigerant with a GWP of 2088. If 1 kg of this refrigerant fluid were released into the atmosphere, therefore, the impact on global warming would be 2088 times higher than 1 kg of CO2, over a period of 100 years. Under no circumstances should the user try to intervene on the refrigerant circuit or disassemble the product. Always contact qualified personnel if necessary.
