

INDIVIDUAL CONTROLS

MULTILINGUAGE DESIGN CONTROL
RC-ES1

Design wired control with color LCD display and touch buttons: compact and without frames, this control is particularly suitable for integrating into environments such as hotel rooms.

Through a dedicated smartphone app, through which it is possible to connect up to 5 devices to the control at the same time, it is possible to have complete access to all the functions of the control and also makes configuring the units extremely simple.

Finally, the use of this app allows you to obtain data regarding the operation of the machine (electricity consumption based on the operating mode, error reporting, etc.).

The wired controller can control up to 16 indoor units.

Simple to use, the command has the following main functions:

- On/off.
- Operating modes: heating, cooling, ventilation, dehumidification and automatic.
- Fan speed.
- High power function.
- Timer.
- Airflow orientation.
- Built-in temperature sensor.
