NEW

M-ACCESS

RM-CGW-E2

Management interface via M-ACCESS: this is a remote monitoring system for MHI products that adopts Cloud-type Gateway equipment and which allows centralized management of air conditioning systems from multiple remote locations using the Internet of Things (IoT) .

You can easily monitor and manage the status of external and internal drives via the Internet using, for example, a PC or tablet.

Some of the available functions are as follows:

- real-time monitoring of machines;
- management of operating parameters (on/off, mode, temperature and fan speed);
- electricity consumption and alarm notifications via email.

All MHI residential, commercial, VRF and Q-ton products (with the necessary interface cards) can be connected to this new and innovative system.
